**TARIFF FORMAT**

**Page Numbering** - Page numbers appear in the upper right hand corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 12 and 13 would be 12.1.

**Page Revision Numbers** - Revision numbers also appear in the upper right hand corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th version Page 12 cancels the 3rd version Page 12. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.

**Paragraph Numbering Sequence** - There is eight levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).i.
- 2.1.1.A.1.(a).i.1.

**Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revision made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

**3.1 Connection Charges**

**3.1.1 General**

The Connection Charge is a nonrecurring charge that applies to the ordering, installing, moving, changing, rearranging for furnishing telephone services and facilities. Any one or combination of all elements of the connection charges may apply, depending upon the customer's request.

The customer may request an estimate or a firm bid before ordering installation work to be done. When an estimate is provided, the estimate is not binding on the Company and the charge to be billed will be based on the actual time and materials charges incurred. When a firm bid is provided at customer request, the charge to be billed is the amount quoted to the customer for the work requested.

**3.1.2 Exceptions to the Charge**

A Central Office Line Charge applies to arranging a line(s) to provide service between the central office and the customer's premises.

See Section 9 for charges. The rates and charges listed are in addition to all other applicable rates and charges for the facilities furnished.

**3.7 Primary Interexchange Carrier Change Charge - Toll Presubscription**

3.7.1 Toll Presubscription is a procedure whereby a customer designates to the Telephone Company the IntraLATA and InterLATA Toll Providers, i.e., Interexchange Carriers (IXCs) which the customer wishes to be the carriers of choice for toll calls. Such calls are automatically directed to the designated carrier(s) without the need to use carrier access codes or additional dialing to direct the calls to the designated carrier. Toll presubscription does not prevent a customer, who has presubscribed to a toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred IXC, only one access code of that carrier may be incorporated into the switching system of the Telephone Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other service(s).

IXC's must use Feature Group D (FGD) Switched Access Service to qualify as a presubscription toll provider unless prior arrangements have been made with or by the Telephone Company. IXC's must submit an Access Service Request (ASR) to the Telephone Company.

Selection of toll presubscription provider by an end user is subject to the following terms and conditions.

3.7.2 At the option of the IXC's, the nonrecurring charge for a change in toll presubscription, as provided herein, may be billed to the IXC's, instead of the end user. This may involve charges resulting from end-user initial free choice Preferred Interexchange Carrier (PIC), as specified in 3.7.3 following.

**3. EXCHANGE SERVICE (Cont'd.)**

**3.7 Primary Interexchange Carrier Change Charge**

3.7.3 Presubscription Charge Application

- A. End user choices for toll presubscription:
- Designating an intraLATA and interLATA IXC(s) as primary carrier(s) thereby requiring no access code to access those IXCs' service. End users are not required to choose the same IXC for intraLATA and interLATA toll presubscription. Other nonpresubscribed IXCs are accessed by dialing 10XXX, 101XXXX, or other required codes.
  - Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all IXCs.
- B. If a new customer cannot decide upon presubscription IXCs, the Telephone Company may extend a 30-day period following completion of the initial service request to make a choice without charge. In the interim, the customer will be assigned as a 'No-PIC' and must dial an access code to make toll calls.
- C. If an IXC elects to discontinue Feature Group, the IXC is obligated to contact, in writing, all end users who have selected the canceling IXC as their preferred toll provider. The IXC must inform the end users that it is canceling its Feature Group D Service, request that the end user select a new IXC, and state that the canceling IXC will pay the PIC change charge as provided herein. The IXC must provide written notification to the Telephone Company that this activity has taken place. Following the IXC's discontinuance of service, the Telephone Company will bill the canceling IXC the change charge for each end user that is currently designated to the IXC at the time of discontinuance.
- D. An unauthorized PIC change is a change in the presubscribed IXC that the end user denies authorizing. PIC disputes for end users are resolved through an investigative process. If an unauthorized change in toll presubscription occurs, the IXC making the unauthorized change will be assessed a charge for unauthorized change in presubscription. In addition, the IXC will be assessed the applicable charge for returning the end user to the preferred IXC. If an unauthorized change in intraLATA and interLATA presubscription occurs at the same time, on the same Business line, and the presubscribed IXC is the same carrier for intraLATA and interLATA, presubscription change charges as provided herein and the Company's corresponding F.C.C. Access Tariff apply. In addition, the IXC will be assessed the applicable charges for returning the end user to the preferred IXC as herein and in the Company's corresponding F.C.C. Tariff.

**3.7 Primary Interexchange Carrier Change Charge**

3.7.4 End User Charge Discrepancy

A. When a discrepancy is determined regarding an end user's designation of a presubscription IXC, the following applies depending upon the situation described:

- A signed letter of authorization takes precedence over any order other than subsequent, direct customer contact with the Telephone Company.
- When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines customer choice.
- If an end user denies requesting a change in toll presubscription as submitted by an IXC, and the IXC is unable to produce a letter of authorization, signed by the end user, the IXC will be assessed all applicable change charges. The nonrecurring change charges are provided herein. The IXC will also be assessed the presubscription change charge as specified herein, which was previously billed to the end user.

B. Verification of Orders for Telemarketing

Neither the IXC or the Telephone Company shall submit a PIC change order generated by outbound telemarketing unless and until the order has first been confirmed in accordance with the F.C.C.'s current anti-slammng practices and procedures.

## Competitive Local Exchange Services

**3. EXCHANGE SERVICE (Cont'd.)****3.7 Primary Interexchange Carrier Change Charge****3.7.5 PIC Switchback Option-Business**

PIC Switchback is an option under which no investigation activities are performed by the Telephone Company when an end user denies requesting a change in primary toll carrier submitted by the IXC's. The IXC participating in PIC Switchback will be billed the PIC Switchback Charge, and the presubscription change charge, as specified herein, to switch the end user to the end user's previous carrier. When the Company is contacted by an end user who denies requesting a change in primary toll carrier, the end user will be credited the charge assessed for the disputed change in carrier, and will be switched back to the previous IXC at no charge. If this service is made available by the Company, IXC's may subscribe to or cancel PIC Switchback Service on thirty (30) days' notice to the Company by submitting a written request. A letter of authorization from the IXC will not be requested or accepted at a later date in the event of dispute of the charges assessed under the PIC Switchback option.

This option in no way relieves an IXC of the F.C.C. requirements for verifying all PIC orders obtained by outbound telemarketing prior to submitting those orders, or instituting steps to obtain verification of orders submitted to the Company. In addition, the end user has the option of initiating a complaint to the F.C.C. or the Pennsylvania Public Utility Commission's Bureau of Consumer Services concerning unauthorized changes in toll presubscription.

**3.7.6 Rates**

Change in IntraLATA Toll Presubscription	\$3.75 per line
Change in InterLATA PIC	\$3.75 per line
Unauthorized Business or Residential service change in intraLATA Toll Presubscription	\$35.65 per line

3. **EXCHANGE SERVICE (Cont'd.)**

3.8 **Remote Call Forwarding Service**

RCF is a service feature whereby all calls placed to an RCF customer's telephone number (the call forwarding location) are automatically forwarded by Company central office equipment to a designated terminating station of such RCF customer which is located in an exchange area of the Company or another telephone company. RCF is subject to the following regulations:

- 1) RCF service will be provided on any exchange service that can be direct inward dialed except semi-public and public telephone service;
- 2) The service is offered from central offices where the Company has arranged the facilities for RCF and is furnished subject to the availability of facilities;
- 3) One primary directory listing, as appropriate, will be provided without charge for the exchange in which the RCF central office is located;
- 4) Since the grade of transmission on calls that are remotely forwarded may vary, depending upon the location of the calling party in relation to the terminating station, the Company cannot guarantee transmission on forwarded calls;
- 5) Each RCF feature allows for forwarding one call at a given time. An additional feature is necessary for each additional call to be forwarded simultaneously. The customer must subscribe to sufficient RCF features and facilities at the terminating station to adequately handle calls without impairing, disrupting or deteriorating services offered by the Company. In the event that the use of RCF causes such impairment, disruption or deterioration, the Company shall have the right to discontinue forthwith such service without prior notification to the customer; and
- 6) The Company will not provide identification of the originating telephone number to an RCF customer.

**4. SUPPLEMENTAL SERVICES**

This Section describes supplemental services and charges associated with those services.

**4.1 Custom Calling Service**

**4.1.1 General**

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all classes of service. Transmission levels may not be sufficient in all cases. Connection charges may apply when a customer requests connection to one or more custom calling features. Orders requested for the same customer account made at the same time for the same premises will be considered one request. These charges may not apply if the features are ordered at the same time as other work for the same customer account at the same premises.

The Company may elect to offer a free or reduced rate trial of any new CLASS feature(s) to prospective customers within 90 days of the establishment of the new feature.

**4.1.2 Description of Features**

A. Three Way Calling/Call Hold

The Three Way Calling feature allows a customer to add a third party to an existing two-way call and form a three-way call. The call must have been originated from outside the station group and terminate to a station within the station group. The Call Hold feature allows a customer to put any in-progress call on hold by flashing the switch-hook and dialing a code. This frees the line to allow the customer to make an outgoing call to another number. Only one call per line can be on hold at a time. The third party cannot be added to the original call.

See Section 9. for charges. The rates and charges listed are in addition to all other applicable rates and charges for the facilities furnished.

Call Waiting provides a tone signal to indicate to a customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the customer disconnects from the call.

See Section 9. for charges. The rates and charges listed are in addition to all other applicable rates and charges for the facilities furnished.

**4.1 Custom Calling Service (Cont'd.)**

**4.1.2 Description of Features (Cont'd.)**

**I. Anonymous Call Rejection**

Anonymous Call Rejection (ACR) is a service that enables customers the ability to reject calls from parties who have a privacy feature that prevents the delivery of their calling number to the called party when the called party has Caller ID with Name. With ACR the called customer receives no alerting or ringing for a call that is rejected. The call is routed to a denial announcement and subsequently terminated. The calling party hears a denial announcement that indicates the calling party can retry their call after unblocking their number.

See Section 9. for charges. The rates and charges listed are in addition to all other applicable rates and charges for the facilities furnished.

**J. Auto Call Back/Auto Redial**

The Auto Call Back/Auto Redial feature allows a customer to automatically redial the last number dialed. This is accomplished by the customer activating a code. The network periodically tests the busy/free status of the called line for up to 30 minutes until both lines are found free and then redials the call for the customer.

The Automatic Redial feature also allows customers, having reached a busy number, to dial a code before hanging up. Automatic Redial feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically redialed and the customer is notified of the connected call via a distinctive ring.

See Section 9. for charges. The rates and charges listed are in addition to all other applicable rates and charges for the facilities furnished.

**L. Customer Originated Trace**

Customer Originated Trace allows customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the Company the customer can use this application to combat nuisance calls.

See Section 9. for charges. The rates and charges listed are in addition to all other applicable rates and charges for the facilities furnished.
